

17과 잠을 푹 자면 좋겠어요

Chapter 17 — I wish I could sleep soundly

This chapter at a glance

주제	Topic 건강 — health
어휘와 문법	Vocabulary & grammar 건강한 생활 습관 / 건강 이상 증상 / 동형-으면 좋겠다 / 명에 — healthy habits · symptoms when you are unwell · saying what you wish for · saying what something is good for
활동	Activities 건강에 대해 조언하기, 건강한 생활 습관에 대해 글 쓰기 — giving health advice; writing about your own healthy habits
문화와 정보	Culture & information 민간요법 — folk remedies

Health is the topic where a language stops being an exam subject. This chapter gives you the words for saying which part of you is wrong, and the words for what someone tells you to do about it — the two halves of every conversation at a pharmacy counter, a clinic desk or a workplace canteen.

동형-으면 좋겠다 is the ordinary way of saying 'I wish' or 'I'd like it if'. It is softer than -고 싶다: 자고 싶어요 is 'I want to sleep', 잤으면 좋겠어요 is 'it would be good if I slept' — a wish rather than a demand, which is why it is what you use about other people.

명에 is one letter and it carries the whole second half of the chapter: 눈에 좋아요, 감기에 좋아요, 건강에 좋지 않아요. Korean marks the thing that benefits, not the thing that does the benefiting.

도입

Warm-up

이 사람들은 건강을 위해서 뭘 해요?

What do these people do for their health?

여러분은 건강을 위해서 뭘 해요?

What do you do for yours?

What the original page shows

사진 1

a family of three cycling along a park path in helmets and knee pads

사진 2

workmen in overalls eating a proper lunch together in a canteen

사진 3

a man asleep in bed, smiling, with morning light at the window

The three photographs are the three habits the chapter will name: 운동을 꾸준히 하다, 식사를 규칙적으로 하다, 잠을 충분히 자다. Exercise, meals, sleep — in Korean health advice these three come as a set, and almost always in that order.

건강을 위해서 — 'for the sake of your health'. 명을 위해서 is the standard way to say what something is done for, and you will meet it constantly on posters: 여러분의 건강을 위해서, 안전을 위해서.

어휘와 문법 1 — 건강한 생활 습관

Vocabulary & grammar 1 — healthy living habits

여러분의 건강은 어때요? 보통 어떻게 생활해요?

How is your health? How do you usually live?

건강한 생활 습관 — the good habits

잠을 충분히 자다

to get enough sleep

음식을 골고루 먹다

to eat a balanced range of food

식사를 규칙적으로 하다

to eat meals at regular times

운동을 꾸준히 하다

to exercise steadily, keeping it up

건강하지 않은 생활 습관 — and their opposites

잠이 부족하다

to be short of sleep

편식이 심하다

to be a very fussy eater

식사가 불규칙하다

to eat at irregular times

운동을 거의 하지 않다

to hardly ever exercise

Notice which side takes 을/를 and which takes 이/가. 잠을 자다 but 잠이 부족하다; 운동을 하다 but 편식이 심하다. The good habits are things you do, so they take the object marker; the bad ones are states that describe you, so the noun becomes the subject.

충분히, 골고루, 규칙적으로, 꾸준히 are the four adverbs to learn here, and they carry the meaning. 꾸준히 in particular has no neat English word: it means keeping something up over time without dropping it, and it is high praise.

편식 is literally 'lop-sided eating' — eating only what you like. 편식이 심하다 is what a Korean parent says about a child who will eat nothing but meat, and it is a real complaint, not a joke.

저는 건강한 편이에요. 운동을 꾸준히 하거든요.

I'm on the healthy side. I exercise regularly, you see.

형-은 편이다 — 'on the ... side' — is the hedge you want for anything about yourself. 건강해요 claims you are healthy; 건강한 편이에요 says you are more healthy than not, which is both truer and more Korean.

건강한 생활 습관에는 또 무엇이 있어요? 이야기해 보세요.

What other healthy habits are there? Talk about them.

일찍 자고 일찍 일어나는 게 좋아요.

It's good to go to bed early and get up early.

동형-으면 좋겠다

Verb/adjective + -으면 좋겠다 — I wish, I'd like it if

희망을 말할 때 사용해요.

Used to say what you hope for.

가 이 옷은 어떠세요?

How is this one?

나 디자인은 마음에 드는데 조금 작으면 좋겠어요.

I like the design, but I wish it were a bit smaller.

예문 — Examples

가 주말에 한국어능력시험 보지요?

You're sitting the TOPIK at the weekend, aren't you?

나 네, 맞아요. 이번에는 꼭 합격하면 좋겠어요.

Yes, that's right. I really hope I pass this time.

이번 여름에 고향에 갔다 오면 좋겠어요.

I'd like to get home and back this summer.

비자를 연장할 수 있으면 좋겠어요.

I hope I can extend my visa.

Which form do I use?

-으면 좋겠다

after a final consonant (받침)

먹다 → 먹으면 좋겠다 · 작다 → 작으면 좋겠다

-면 좋겠다

after a vowel, and after ㄹ

가다 → 가면 좋겠다 · 건강하다 → 건강하면 좋겠다

This is the -으면 you already know from chapter 11 with 좋겠다 stuck on the end: 'if X, it would be good'. Once you see it that way the conjugation needs no new rule at all.

You will also hear the past form — 잤으면 좋겠어요, 합격했으면 좋겠어요 — and it means exactly the same thing. The past tense here makes the wish feel further from reality, and Koreans use both without distinction in everyday speech.

Use it for other people, where -고 싶다 cannot go. 딸이 일찍 일어나고 싶어요 is wrong — that would be the daughter's wish. 딸이 일찍 일어나면 좋겠어요 is yours.

연습 1 — 가족들이 무엇을 하면 좋겠어요?

보기) 딸 — 일찍 일어나다

example: daughter — get up early

1) 남편 — 아침을 꼭 먹다

husband — always eat breakfast

2) 딸 — 게임을 덜 하다

daughter — play fewer games

3) 남편 — 술을 덜 마시다

husband — drink less

우리 딸이 일찍 일어나면 좋겠어요.

I wish my daughter would get up early.

덜 is 'less' — the opposite of 더. 덜 하다, 덜 마시다, 덜 짜다. It goes in front of the verb, exactly where 더 would, and it is gentler than 하지 마세요.

연습 2 — 여러분은 올해 꼭 하고 싶은 일이 있어요? 친구와 이야기해 보세요.

저는 올해 한국어능력시험 3급에 합격하면 좋겠어요.

This year I'd really like to pass level 3 of the TOPIK.

어휘와 문법 2 — 건강 이상 증상

Vocabulary & grammar 2 — when something is wrong

지금 괜찮아요? 어디가 안 좋아요?

Are you all right? What's bothering you?

건강 이상 증상 — symptoms

안색이 안 좋다

to look pale, to look unwell

입맛이 없다

to have no appetite

얼굴에 뭐가 나다

to break out in spots

소화가 안 된다

to have indigestion

힘(기운)이 없다

to have no energy

어지럽다

to be dizzy

열이 나다

to have a temperature

몸살이 나다

to ache all over, to come down with something

Six of these eight are 이/가 + a verb of existing or happening, and the pattern is worth seeing as a pattern: the symptom is the subject and you are only the place it happens. Korean says 'a temperature comes out', not 'I have a temperature'.

나다 is the verb doing most of the work — 열이 나다, 몸살이 나다, 뭐가 나다. It means something appears or breaks out of its own accord, which is precisely how symptoms behave.

몸살 has no English equivalent. It is the whole-body ache and heaviness you get after overdoing it or before a cold takes hold, and 몸살이 났어요 is a complete and accepted reason to stay off work.

어지럽다 is a ㅁ-irregular: 어지러워요, 어지러웠어요. It behaves like 춥다 and 덥다, which you already conjugate without thinking.

저는 소화가 안 돼요. 요즘 계속 그러네요.

My digestion is off. It's been like this for a while now.

여러분은 피곤할 때 어디가 안 좋아요?

Where do you feel it when you're tired?

저는 피곤할 때 어지러워요.

When I'm tired I get dizzy.

어디가 안 좋아요? is the question a Korean doctor, pharmacist or colleague will actually ask you — literally 'where is not good?'. Answer with the symptom, not with a diagnosis.

명에

Noun + 에 — good for ...

어디에 좋은지 나쁜지를 말할 때 사용해요.

Used to say what something is good or bad for.

가 이링 씨, 당근을 잘 먹네요. 당근을 좋아해요?

Iring, you're eating a lot of carrot. Do you like it?

나 당근은 눈에 좋아요. 그래서 많이 먹으려고 해요.

Carrots are good for the eyes, so I try to eat plenty.

예문 — Examples

가 요즘 계속 피곤한 것 같아요.

I seem to be tired all the time lately.

나 그러세요? 그럼 귤을 드세요. 귤은 피로 회복에 좋아요.

Really? Then have some tangerines — they're good for getting your energy back.

감기에 비타민 시(C)가 좋아요.

Vitamin C is good for a cold.

담배는 건강에 좋지 않아요. 담배를 끊으세요.

Cigarettes aren't good for your health. Give them up.

How it attaches

눈 → 눈에

the eyes

건강 → 건강에

your health

감기 → 감기에

a cold

소화 → 소화

digestion

에 never changes form, whatever the noun ends in — that is the whole rule. The work is remembering that Korean puts the marker on the beneficiary, so it is 눈에 좋다, not the English shape 'good for the eyes' translated word by word.

Tip from the book: 명이 사람이면 '사람에게'를 사용해요. If the thing being helped is a person, use 에게 instead — 아이에게 좋아요, not 아이에 좋아요. 한테 is the spoken equivalent.

피로 회복 — 'recovery from fatigue' — is a set phrase you will see on every energy drink and vitamin box in a Korean pharmacy. Learn it whole.

연습 1 — 다음은 어디에 좋을까요? 어디에 안 좋을까요? 이야기해 보세요.

보기) 사과 — 소화 ○

example: apples — digestion, good

1) 충분한 잠 — 피부 ○

enough sleep — skin, good

2) 따뜻한 차 — 감기 ○

hot tea — a cold, good

3) 짠 음식 — 건강 X

salty food — health, bad

사과는 소화에 좋아요.

Apples are good for the digestion.

연습 2 — 여러분은 건강을 위해서 자주 먹는 음식이 있어요? 그 음식은 어디에 좋아요?

저는 아침마다 사과를 하나 먹어요. 사과는 피부에도 좋고 소화에도 좋거든요.

I eat an apple every morning. They're good for the skin and good for the digestion, you see.

말하기와 듣기

Speaking & listening

아나이스 씨와 제이슨 씨가 건강에 대해 이야기해요.

아나이스 제이슨 씨, 무슨 일 있어요? 안색이 안 좋아요.

Jason, is something wrong? You look pale.

제이슨 요즘 밤에 잘 못 자요. 잠을 충분히 자면 좋겠어요.

I haven't been sleeping well at night. I wish I could get enough sleep.

아나이스 그러면 자기 전에 따뜻한 물로 샤워를 해 보세요. 불면증에 좋거든요.

Then try a warm shower before bed. It's good for insomnia, you see.

제이슨 그래요? 오늘부터 한번 해 봐야겠어요.

Is it? I'll give it a go starting tonight.

아나이스 며칠 해 보면 괜찮아질 거예요.

Try it for a few days and you'll be fine.

제이슨 알려 줘서 고마워요.

Thanks for telling me.

The dialogue is built out of everything in the chapter: 안색이 안 좋다 to open it, -으면 좋겠다 for the complaint, -에 좋다 for the advice. Learn it as a script and you have the shape of every health conversation you will have.

해 봐야겠어요 — 'I'd better try it'. -어야겠다 is a decision you make on the spot in response to what someone just said, and it is the natural thing to reply when you are given advice you intend to take.

바꿔서 말하기 — swap these in

1) 밤에 잘 못 자다 · 잠을 충분히 자다

not sleeping well at night · getting enough sleep

→ 자기 전에 따뜻한 물로 샤워를 하다, 불면증에 좋다

→ take a warm shower before bed — good for insomnia

2) 소화가 안 되다 · 속이 좀 편안해지다

having indigestion · your stomach settling a bit

→ 아침에 사과를 먹다, 소화에 좋다

→ eat an apple in the morning — good for digestion

몸이 안 좋을 때 여러분은 어떻게 해요? 여러분만의 특별한 방법에 대해 이야기해 보세요.

What do you do when you're not feeling well? Talk about your own particular remedy.

듣기 — 여자가 라디오에서 건강 고민을 이야기하고 있어요. 잘 듣고 답해 보세요.

1) 여자는 무엇에 대해 걱정해요?

What is the woman worried about?

2) 남자가 알려 준 방법으로 맞는 것은 ○, 틀린 것은 X 하세요.

Mark ○ for the advice the man gave, X for what he didn't.

① 간식을 조금만 드세요.

Eat only a little between meals.

② 운동을 더 자주 하세요.

Exercise more often.

③ 물을 많이 드세요.

Drink plenty of water.

고민 is a worry you are turning over in your mind, and a 고민 상담 — someone writing in with a problem and being answered — is a fixture of Korean radio and television. It is also the word to use with a friend: 고민이 있어요.

읽기와 쓰기

Reading & writing

〈일상생활 속 건강한 생활 습관〉 — Healthy habits in everyday life

첫째, 충분히 잠자기 — First, sleeping enough

충분히 잠을 자려면 먼저 커피를 많이 마시지 않아야 됩니다.

To sleep enough, first you must not drink a lot of coffee.

또 침대에 누워서 휴대 전화를 많이 보면 안 됩니다.

And you mustn't lie in bed looking at your phone for long.

자기 전에 따뜻한 물로 샤워하고 마음이 편해지는 음악을 들으면 꼭 잘 수 있습니다.

If you shower in warm water before bed and listen to music that calms you, you can sleep soundly.

따뜻한 우유를 한 잔 마시는 것도 좋습니다.

A glass of warm milk is good too.

둘째, 일상생활에서 운동하기 — Second, exercising as part of the day

가까운 거리는 걸어서 갑니다.

Walk anywhere that's close by.

엘리베이터와 에스컬레이터보다는 계단을 이용합니다.

Let's take the stairs rather than the lift or the escalator.

생활 속의 가벼운 운동은 건강에 매우 좋습니다.

Light exercise built into your day is very good for your health.

셋째, 건강에 좋은 음식 먹기 — Third, eating food that is good for you

짠 음식이나 단 음식 등을 많이 먹지 않습니다. 몸에 좋지 않기 때문입니다.

Don't eat much salty or sweet food — because it isn't good for the body.

채소와 과일을 많이 먹습니다.

Eat plenty of vegetables and fruit.

당근은 눈 건강에 좋고, 오렌지나 귤은 피로 회복에 좋습니다.

Carrots are good for eye health, and oranges or tangerines are good for recovering from tiredness.

The whole passage is in the 합니다 style, which is what written advice and public notices use. Read it aloud and you have the register for anything official; it is not how you would say the same thing to a friend.

첫째, 둘째, 셋째 order the points, and -기 turns each verb into a heading: 잠자기, 운동하기, 먹기. That pair — a number word plus a -기 noun — is the standard shape of a Korean list, and the writing task asks you to copy it.

질문 — Questions

1) 건강한 생활 습관이 아닌 것은 뭐예요?

Which is not a healthy habit?

① 푹 자기 ② 자주 운동하기 ③ 편식하기 ④ 야채 많이 먹기

sleeping soundly · exercising often · eating only what you like · eating plenty of vegetables

2) 자기 전에 무엇을 하면 쉽게 잘 수 있어요?

What can you do before bed to fall asleep easily?

3) 다음 중 건강에 좋지 않은 음식은 뭐예요? 모두 고르세요.

Which of these are not good for you? Choose all that apply.

① 짠 것 ② 매운 것 ③ 단 것 ④ 쓴 것

salty · spicy · sweet · bitter

Question 3 asks for everything that applies, and the passage names two — 짠 음식 and 단 음식. Spicy and bitter are not mentioned, so they are not answers however you feel about them.

쓰기 — 여러분만의 건강한 생활 습관과 이유를 써 보세요.**〈나만의 건강한 생활 습관〉**

My own healthy habits

첫째,

First, ...

둘째,

Second, ...

셋째,

Third, ...

Give a reason for each one and the -에 좋다 you learned two pages ago does the job: 저는 아침마다 사과를 먹습니다. 사과는 소화에 좋기 때문입니다.

단어장

New word

불면증 — insomnia

문화와 정보 — 민간요법

Culture & information — folk remedies

한국에서는 옛날부터 몸이 아플 때 병원에 가거나 약을 먹지 않고 병을 고치는 방법들이 전해지고 있습니다.

In Korea, ways of treating illness without going to hospital or taking medicine have been handed down since long ago.

예를 들어 소화가 되지 않을 때 어머니들은 아픈 아이의 배를 손으로 쓸어 주었습니다.

For instance, when a child had indigestion, mothers would rub the child's stomach with their hand.

이렇게 아픈 배를 낫게 하는 어머니의 손을 '약손'이라고 불렀습니다.

A mother's hand that eased a sore stomach this way was called 약손, a healing hand.

기침이 심할 때는 배를 끓여서 먹으면 기침이 사라지고, 술을 많이 마신 다음 날에는 콩나물국을 먹으면 술이 잘 깎입니다.

For a bad cough, boiled pear made the cough go away; the morning after too much drink, bean sprout soup cleared your head.

이러한 민간요법은 과학적인 근거가 없는 것도 있지만 어떤 방법은 의학적으로 그 효과가 입증되어 지금까지 사랑받고 있습니다.

Some folk remedies have no scientific basis, but the effect of others has been proved medically, and they are still loved today.

약손 is worth knowing for what it says rather than what it does. 엄마 손은 약손 — 'mother's hand is a healing hand' — is what is chanted while rubbing a child's stomach, and every Korean adult has heard it.

콩나물국 for a hangover is the one on this page that is genuinely everyday. Bean sprouts contain asparagine, which does help the liver, and 해장국 — 'hangover-clearing soup' — is a whole restaurant category built around the idea.

배 is two words here. 배를 쓸어 주다 is the stomach; 배를 끓여서 is the pear. Same spelling, and the sentence about coughs uses the fruit.

술이 깨다 is 'to sober up' — the alcohol wears off by itself, so 깨다 takes 술 as its subject rather than you. 술이 깰어요, 아직 안 깰어요.

Questions

1) 한국의 민간요법에는 어떤 방법이 있어요?

→ 약손으로 배를 쓸어 주기, 배를 끓여서 먹기, 콩나물국 먹기

2) 이러한 민간요법은 모두 과학적인 방법이에요?

→ 아니요, 과학적인 근거가 없는 것도 있어요

3) 여러분 고향에는 어떤 민간요법이 있어요?

→ What folk remedies are there where you come from?

발음 · 배운 어휘 확인

Pronunciation · Vocabulary checklist

발음 1 — 다음을 듣고 따라 읽으세요.

좋겠어요 [조케써요]

the ㅎ of 좋- merges with the following ㄱ to make ㅋ

불규칙한 편이에요 [불규치칸 퍼니예요]

ㄱ meets ㅎ and becomes ㅋ; 편이 then links across to give 퍼니

하지 않지만 [하지 안치만]

the ㅎ of 않- merges with ㅈ to make ㅊ

All three are the same rule — 격음화, aspiration. When ㅎ meets ㄱ, ㄷ, ㅈ or ㅂ, the two collapse into a single aspirated ㅋ, ㅌ, ㅊ or ㅍ. It works in both directions: ㅎ before the consonant in 좋겠어요, the consonant before ㅎ in 불규칙한.

This is why 축하해요 is [추카해요] and 못하다 is [모타다]. Once you hear it as one rule rather than a list of exceptions, a large part of Korean pronunciation stops being irregular.

발음 2 — 다음을 듣고 연습해 보세요.

잠을 충분히 자면 좋겠어요.

I wish I could get enough sleep.

가 요즘 소화가 안 돼요?
Is your digestion off at the moment?

나 네, 식사가 불규칙한 편이에요.
Yes — my meals are on the irregular side.

가 운동을 자주 하세요?
Do you exercise often?

나 자주 하지 않지만 가끔 1시간 정도 걸어요.
Not often, but now and then I walk for an hour or so.

배운 어휘 확인 — Vocabulary checklist

잠을 충분히 자다
get enough sleep

입맛이 없다
have no appetite

운동을 꾸준히 하다
exercise steadily

열이 나다
have a temperature

식사가 불규칙하다
eat at irregular times

불면증
insomnia

힘(기운)이 없다
have no energy

식사를 규칙적으로 하다
eat at regular times

얼굴에 뭐가 나다
break out in spots

편식이 심하다
be a very fussy eater

몸살이 나다
ache all over

안색이 안 좋다
look pale

음식을 골고루 먹다
eat a balanced range of food

어지럽다
be dizzy

잠이 부족하다
be short of sleep

소화가 안 되다
have indigestion

운동을 거의 하지 않다
hardly ever exercise

피로 회복
recovery from tiredness
